

TERMINAL && VIM

FOR BEGINNERS

By Aurelien Focant
(afocant@student.s19.be)

CONTENTS

- ▶ Terminal: make it yours
 - ▶ .zshrc
 - ▶ a few shortcuts
- ▶ Git: shouldn't be this hard
 - ▶ and a remote
- ▶ Vim: become a wizard
 - ▶ .vimrc
 - ▶ basic motions

TERMINAL: .ZSHRC

- ▶ Example: make aliases
- ▶ `rc == "run commands"`
- ▶ Control and discover all your options
 - ▶ don't use tools like oh-my-zsh (just yet)

TERMINAL: NAVIGATION SHORTCUTS

- ▶ google "terminal shortcuts"
- ▶ `<C-a>` → beginning of line
- ▶ `<C-e>` → END of line
- ▶ `<Esc-f>` → one word FORWARDS
- ▶ `<Esc-b>` → one word BACKWARDS
- ▶ `<C-w>` → delete preceding WORD
- ▶ `<Esc-D>` → delete following word

TERMINAL: NAVIGATION SHORTCUTS

- ▶ `<Esc>` remapped to `<Alt>` (!?)
- ▶ `<Esc-f>` → one word FORWARDS
- ▶ `<Esc-b>` → one word BACKWARDS
- ▶ `<C-w>` → delete preceding WORD
- ▶ `<Esc-D>` → delete following word

TERMINAL: ARROWS SHORTCUTS

- ▶ never use the arrows again !
- ▶ `<C-b>` → Backwards (left arrow)
- ▶ `<C-f>` → Forwards (right arrow)
- ▶ `<C-p>` → Previous (up arrow)
- ▶ `<C-n>` → Next (down arrow)

TERMINAL: HISTORY

- ▶ google “bash history expansion”
- ▶ !! → whole last command
- ▶ !\$ → last word of last command
- ▶ !* → last cmd except 1st word
- ▶ <C-r> → 🤯

TERMINAL

- ▶ pssst:
 - ▶ don't forget your Shell00 !
- ▶ Unix commands
 - ▶ find
 - ▶ grep
 - ▶ ...
- ▶ Learn piping and redirection
- ▶ etc etc

TERMINAL: SHORTCUTS

- ▶ how many hours are you going to spend in the terminal??

TERMINAL: SHORTCUTS

questions ?

INTERLUDE: LEARN GIT

- ▶ Be very mindful of your file trees
 - ▶ Use the terminal only
 - ▶ Don't have many versions of the same file
- ▶ → use GIT
 - ▶ Github, Gitlab, Bitbucket, etc...
 - ▶ self-hosting ?
- ▶ Use panes, tabs, <C-z> and fd ...
 - ▶ try different ways and find yours

VIM: A BIT OF CONTEXT

Lear Siegler ADM-3A Terminal (1976)

VIM: HORIZONTAL NAVIGATION

- ▶ `w` → start of next WORD
- ▶ `b` → BACK to start of previous word
- ▶ `e` → END of next word
- ▶ `W`, `B`, `E` → new definition of word
 - ▶ word now in between two blanks

VIM: HORIZONTAL NAVIGATION

- ▶ `_` → go to beginning of line
- ▶ `$` → go to end of line
- ▶ `i` → INSERT at cursor
- ▶ `a` → APPEND after cursor
- ▶ `I` → INSERT at beginning of line
- ▶ `A` → APPEND at end of line
- ▶ `u` → UNDO
- ▶ `<C-r>` → REDO

VIM: VERTICAL NAVIGATION

(THIS IS THE ABSOLUTE BANGER!)

- ▶ but first, `.vimrc` !!
 - ▶ `set number`
 - ▶ `set relative number`
 - ▶ `syntax on`
 - ▶ `set smartindent`

VIM: VERTICAL NAVIGATION

(THIS IS THE ABSOLUTE BANGER!)

▶ j → down

JK

▶ k → up

↓ ↑

▶ 13j → 13 line down

▶ 9k → 9 line up

▶ ==> code with intention

VIM: VERTICAL NAVIGATION

(THIS IS THE ABSOLUTE BANGER!)

- ▶ add verbs (actions): **J K**
↓ ↑
- ▶ d → DELETE (== cut)
- ▶ y → YANK (== copy)
- ▶ p → PASTE (== paste)

- ▶ dd → delete whole line
- ▶ yy → yank whole line
- ▶ p → paste under cursor
- ▶ P → paste above cursor

VIM: VERTICAL NAVIGATION

(THIS IS THE ABSOLUTE BANGER!)

J K

↓ ↑

- ▶ `d7j` → delete 7 lines down (incl.)
- ▶ `y8k` → yank 8 lines up (incl.)
- ▶ `p` → paste lines under cursor
- ▶ `P` → paste lines above cursor

- ▶ `====>` code in logical blocks

VIM: FIND WHAT WORKS FOR YOU

- ▶ o → OPEN new line under cursor
- ▶ ddko (delete line, up, open)
 - ▶ ==> replaces the lines
- ▶ ea (end of word, append)
 - ▶ ==> finish word
- ▶ "how do I do this in Vim ?"
